

RIGIDITY

REED VISES are rigid and strong. Work performed on an object held in a Reed vise is delivered to the object and not **wasted** through recoil of the vise.

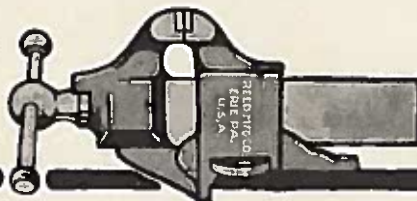

This absence of recoil is due to four things, scientific design, ample weight, proper distribution of "mass," and use of most rigid material practical—**cast iron**. Rigidity is one of the most important requisites of a good vise.

QUALITY

REED VISES have been known as **Quality Vises** for many years. In the Reed organization it is a matter of pride as well as business honor that our vises are made the very best we know how. Back of this intent is our experience of many years supplemented by close contact with those who sell and use our product. Reed Vises are preferred where they are best known.

REED VISES

**ARE STRONGEST AND
LAST LONGEST**
